

INSTRUMENTS CATALOGUE

STERILE DISPOSABLE SURGICAL INSTRUMENTS

Surgical instruments are single use stainless steel instruments suitable for all types of practices: operation theatres, surgical wards, outpatient clinics and wherever needed.

The benefits of using Sterile disposable surgical instruments:

Efficient & Conveniently

Efficient & Conveniently as you need it:

Single packed or included in procedure sets.

Cost efficient:

No hidden costs related to reprocessing (precleaning, cleaning, packing, sterilization, stock management, etc.), or service.

Convenient:

The unique dispenser box system provides an opportunity for efficient shelf management and a tidy storage at the health care facility. Each dispenser box contain a maximum of 20 instruments.

All instruments are sterilized and given a shelf-life of 3 years.

Brand new and single use:

Each instrument bear a red CE-mark and a single-use symbol. In addition each handle of the instrument has been given a red identification marking.

Always sterile:

All sharps are protected by a soft "easy to remove" tip or a paper envelope.

The instruments are packed in convenient "see-through" pouches which enables the user to present them aseptically.

Matching reusable standards:

Manufactured in accordance with EN ISO 9001 and EN ISO 13485 standards and fulfil the requirements of EN ISO 7153-1: 2001.

Safe & Efficiency

Corporate Social Responsibility

Stainless steel surgical instruments are manufactured in Asia by carefully selected suppliers.

We periodically audit and monitor working conditions onsite to verify compliance with our Group Code of Conduct and ensure that requirements of all major social and environmental international conventions are met.

Each disposable surgical instrument is quality controlled, packed and sterilized in the European Union.

- Better Care - - Cost Efficient - - Less time -
